About EMPART

EMPART is the review course focussing on day to day management challenges faced by paediatric and emergency physicians involved in the care of critically ill or injured children. The goal of the three-day program is to increase the knowledge through evidence based interactive sessions covering triage and resuscitation, systemic emergencies, trauma capsule, and a potpourri of interesting topics. Each day will have hand-on workshop to enhance the skills for airway management, defibrillation, crucial procedures in trauma including suturing and simulation scenarios.

About EPICON

EPICON is an annual academic conclave for innovators in health care with sheer focus on developing Paediatric Emergency Medicine and Trauma Sciences. The two days congress includes whole day of 'Paediatric Point of Care Ultrasound' by eminent faculty and day 2 of learning to learn through clinical discussions, panel discussions, symposia and case-based learning discussions. The congress provides opportunity to the young faculty and residents to present their research through oral papers and poster presentations and get awarded as well.
